

Achieve the highest level of security through a partnership with SOC professionals 24/7.

AEC CDC is a facility that houses an information security team responsible for monitoring and analysing an organization’s security posture on an ongoing basis. The goal of CDC is to detect, analyse and respond to cybersecurity incidents using a combination of technology solutions and a strong team of professionals.

Cyber Defence Centre consists of three pillars – Respond, Prevent and Predict. 24/7 active monitoring provides a fast response to ongoing security events. Threat intelligence, know-how, and a large team of professionals allow CDC to predict future attacks. With additional teams of specialists, an important part of CDC is the continuous improvement of the level of security level to prevent future compromises of protected infrastructure.

AEC CDC Service Value

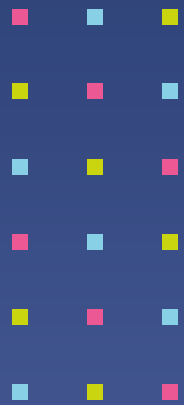

- Large team of specialists in technologies, risk, compliance security and ethical hackers with hundreds of projects each year
- Wide variety of customers with different problems to solve
- Top security vendors and innovative technologies with experience from implementations, maintenance and audits

AEC CDC Business Benefits

- Outsourcing cyber security services to optimize protection of target infrastructure
- Decrease financial costs and increase level of security
- Immediate response in case of cyber-attack or emergency situation
- Coaching security team activities to increase defence capabilities
- Ability to detect and react on sophisticated cyber-attacks
